SOLAR SOLUTIONS

Solar Solutions

Chromagen is a world leader specializing in thermal solar energy systems. Founded in 1962, Chromagen has accumulated years of experience in the field of harnessing the sun's unlimited energy for the purpose of heating water. Chromagen provides systems designed for domestic use in family homes, as well as more complex central systems for commercial applications, such as hotels, hospitals, apartment houses and industrial plants.

Meeting today's needs while keeping tomorrow in mind, Chromagen a major international player in the field of alternative energy, developed a range of efficient and reliable products providing clean, dependable solutions to your water-heating needs.

CHROMAGEN

Products

Chromagen designs its solar systems to meet individual needs, and is involved in the planning and installation at every stage of the way. In addition to its solar collectors and solar storage tanks, Chromagen can provide accessories such as stands and connecting kits.

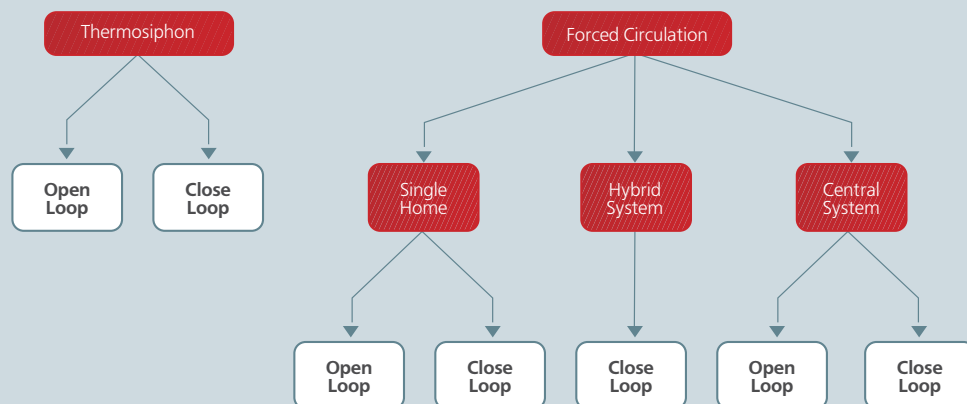

Solar Collectors

Chromagen manufactures solar collectors using state of the art technology. Coated copper fins are ultrasonically welded to copper tubes encased in a frame and covered with tempered solar glass. Stainless steel and aluminum case options are available and while absorbers are available with a variety of coating options: selective paint, black chrome, ultra selective sputtering.

Solar Storage Tanks

Chromagen's storage tanks are available in a range of sizes from 30 to 300 liters and include: solar storage tanks, solar storage tanks with heat exchanger. All tanks are available with an electrical back up, and are coated with an enamel-coating. Tanks can be mounted either vertically or horizontally.

Thermal Solar Systems

Quality Assurance

Chromagen's quality assurance scheme meets the **ISO 9001** standards. Our products are made from the highest quality raw materials, while modern production lines ensure a consistency of precision and finish.

The systems meet the highest standards of quality according to the Standards Institute of Israel, TUV Germany, SPF Switzerland, CSTB France, ENEA Italy, TNO Netherlands, the Homologation scheme in Spain, FSEC – Florida, USA and others.

Chromagen is proud to provide its customers with high quality and efficient products and to be an integral part of the worldwide quest for a cleaner environment through the utilization of renewable energy sources.
